HART SHAW

Chartered Accountants & Business Advisers

Assurance & Advisory

Added Value Audits

An audit should be seen as an opportunity – not just another compliance cost. At Hart Shaw, we work closely with you to learn more about your business. This allows us to provide a risk-based audit service that gives you valuable advice and information about your company and its systems.

HART SHAW

Chartered Accountants & Business Advisers

Our experienced professionals provide an external review of your business, assessing both industry and business related risks affecting your company whilst providing guidance to reduce the potential impact of these risks.

Our fully trained and experienced staff offer a totally independent and objective service that complies with professional ethics and the highest technical quality.

We view the audit process as an opportunity to add value to our clients' businesses, providing professional advice on audit systems and controls.

We are registered to carry out audit work by The Institute of Chartered Accountants in England and Wales, which monitors the help we provide. Independent examiners from the UK200 Group of practising accountants also regularly monitor and assess all of our services to clients.

As we act for clients in various sectors, with organisations varying from small owner managed companies to listed companies, partnerships, solicitors, and not-for-profit organisations, we have expertise in many areas.

Some of our areas of specific expertise include:

- **Statutory and specialist audits**
- **Business risk services – including internal audits and risk management**
- **International financial reporting and auditing standards**
- **Solicitors – our experienced team has a detailed knowledge of solicitor accounts rules and preparing partnership and LLP accounts**
- **Pension schemes – our specialist team is experienced in the audit of pension schemes and can provide assistance with the preparation of pension scheme accounts that fully comply with the reporting requirements**

- **Charities and not for profit organisations – we can provide assistance in the preparation of charity accounts that fully comply with the reporting requirements of the charities act and SORP**

- **Non-statutory audits**

- **Audits of businesses directly authorised by the Financial Services Authority**

- **Assurance reports under the Landlords and Tenants Act and for registered social landlords**

US companies

Hart Shaw LLP is registered with the Public Company Accounting Oversight Board (PCAOB), a private sector, non-profit making corporation created by the Sarbanes Oxley Act 2002 to oversee the auditors of public companies. This registration enables us to audit UK-based subsidiaries of US-owned organisations.

We have always valued the advice and expertise we have received over many years from Hart Shaw. They are there for us whenever we need them and, very importantly, we trust them.

Mr W, Joint Managing Director, South Yorkshire
